

ABRASIVE WHEEL AND CARTRIDGE-OPERATED TOOL REGISTER

Every grinder, cut-off saw and cartridge-operated tool on site, the wheels it may carry, and who is trained to mount them

REGISTER — **RETAIN ON SITE**

KD-INS-AW-037 Rev A0

PUWER 1998 reg 5 requires work equipment to be maintained, reg 6 inspected where safety depends on it, reg 8 information given and reg 9 adequate training — for abrasive wheels that means mounting only by a trained person, the wheel speed checked against the spindle speed, guards fitted and the right flanges used; for cartridge-operated tools, training on the tool, stripping and cleaning at the maker's interval, and cartridges kept locked away. This register lists the tools, the people who may mount wheels, and the checks. Silica dust from cutting is on KD-INS-CO-017, noise on KD-INS-NS-015, vibration on KD-INS-HV-014.

A wheel that has been dropped is scrapped. Wheels are stored flat and dry, never on a hook. A cartridge-operated tool is never pointed at anyone, loaded or not; cartridges are graded by strength and the operator starts with the lowest that does the job.

R REVISION HISTORY

Every revision of this document, and every review that found nothing to change. The revision on the front of this sheet is the one you are holding — check kubitdocs.com for the current one before use.

Rev	Date	Class	What changed	Authorised by
D0	2026-09-02	first-issue	First issue.	— not yet approved —
A0	2026-09-02	review	Approved for issue by the author. Content unchanged from the reviewed draft; the draft status strip is removed. No independent third-party review has been carried out.	Author — director, UK principal contractor, SMSTS. Not an independent review.

Class: first-issue · material (the law, a control, a field or the scope changed — past buyers are notified) · editorial (wording or layout only) · review (checked, nothing changed) · withdrawal. Revision prefix D = draft, not approved and not for sale; A = approved for issue by the person named, on the date shown.
