

**WEEKLY CHECK — RETAIN ON SITE**

Before use every day by the operator — one sheet per compressor and its tools per week

KD-PLT-CP-009 Rev A0

PUWER 1998 regs 5 and 6 cover the compressor and every tool on the end of its hose. The air receiver is a pressure system: where it is above the small-system threshold in Schedule 1, PSSR 2000 regs 8 and 9 require a written scheme of examination and an examination under it, and the sheet asks for the date. The breaker and the drill are where the Control of Vibration at Work Regulations 2005 and the Control of Noise at Work Regulations 2005 bite: the operator's trigger time is recorded because the employer's assessment turns on it. The generic pre-use checklist KD-INS-PL-004 is already on sale, and the lifting-accessory check KD-LIFT-AC-005 does not apply here; this sheet is the weekly record for one compressor and the tools it runs, one sheet per compressor per week, initialised by the operator each day.

# 1 THE COMPRESSOR AND THE WEEK

| PROJECT / SITE REF | SITE               | WEEK COMMENCING | OPERATOR                              |                             |                   |                    |
|--------------------|--------------------|-----------------|---------------------------------------|-----------------------------|-------------------|--------------------|
| MAKE / MODEL       | FLEET / SERIAL NO. | OWNER / HIRER   | WRITTEN SCHEME — LAST EXAM / NEXT DUE | TOOLS RUN FROM IT THIS WEEK | HOURS START / END | STATUS AT WEEK END |

**2 THE CHECKS — BEFORE USE, EVERY DAY; TICK OR INITIAL THE DAY COLUMN WHEN CHECKED AND SATISFACTORY, OR WRITE THE DEFECT IN THE LAST COLUMN**

1. Walk-round: no fuel or oil leak, guards and belt covers on, canopy doors closed; on a towed set the jockey wheel up, the hitch pinned and the handbrake on · 2. Receiver drained of condensate; pressure gauge reads and the safety valve is present and not tied down; the written scheme examination is in date · 3. Hoses: no cuts, bulges, kinks or chafing; every coupling secured with its safety pin or clip and a whip-check across every joint · 4. Fluids and warnings: engine oil, coolant, fuel; refuelled only with the set stopped; no warning lights after start · 5. Tools: steels and chisels the right fit and the retainer on; triggers and throttles return to off and are not tied or wedged on; silencers and mufflers in place · 6. Hearing protection and anti-vibration gloves in use; the operator's trigger time today recorded in the initials row where the site's noise and vibration assessments require it · 7. Set on firm ground, secured against movement, exhaust away from people, openings and welfare; fire extinguisher at the set
