

DESIGN CHECK CERTIFICATE

FORM — SITE FILE

The checker confirms the design, the category, the assumptions, and the drawings and revision checked

KD-TW-DC-004 Rev A0

The checker's certificate: which drawings and calculations, at which revision, were checked, at what category and by whom, and that the design will do what the brief asked. BS 5975-1:2024 has the check completed and certified before erection starts; enter the certificate number against the item in the register's "Design check by" column (KD-SITE-TW-018), and the site builds from the revision this sheet names and no other. Where the check leads to the design being changed, the person making the change is a designer under CDM 2015 (reg 2 definition; reg 9 duties). This certificate is the checker's record of what was checked, at which revision, and at what independence. A drawing revised after this certificate is not a checked drawing until the change control record (KD-TW-CC-006) says the check was repeated.

1 THE SCHEME AND THE DESIGN

PROJECT / SITE REF	SITE	DATE	CERTIFICATE ISSUED BY (CHECKER)
TW REGISTER NO.	TEMPORARY WORKS ITEM AND LOCATION	DESIGN REF AND REVISION	
DESIGNER	DESIGN BRIEF REF	CATEGORY	CERTIFICATE NO.

2 DRAWINGS AND CALCULATIONS CHECKED — THE REVISION LISTED IS THE REVISION TO BUILD FROM

DRAWING / CALC REF	TITLE	REV CHECKED	DATE

3 THE CHECK

- ☐ Category 0 — standard solution confirmed used within the published limits of the supplier data or standard detail named in section 2 (check by the site or design team)
- ☐ Checked by another member of the design team (category 1)
- ☐ Checked by an individual not involved in the design and not consulted by the designer, within the same organisation (category 2)
- ☐ Checked by an independent organisation (category 3)
- ☐ The design meets the brief; every departure from the brief is listed in section 4 and agreed with the coordinator
- ☐ Loads, load paths and load cases checked for every stage — erection, loading, in use, strike
- ☐ Stability, restraint and lateral load checked, including the part-built and part-struck conditions
- ☐ Bearing and foundations checked against the ground or structure the brief describes; the assumption is stated on the drawing
- ☐ Proprietary equipment used within the supplier's published capacities and conditions; substitutions named
- ☐ Drawings and calculations agree with each other; tolerances, inspection points, loading limits and strike criteria are on the drawings
- ☐ Residual risks for erection, use and strike are stated for the site

R REVISION HISTORY

Every revision of this document, and every review that found nothing to change. The revision on the front of this sheet is the one you are holding — check kubitdocs.com for the current one before use.

Rev	Date	Class	What changed	Authorised by
D0	2026-09-02	first-issue	First issue.	— not yet approved —
A0	2026-09-02	review	Approved for issue by the author. Content unchanged from the reviewed draft; the draft status strip is removed. No independent third-party review has been carried out.	Author — director, UK principal contractor, SMSTS. Not an independent review.

Class: first-issue · material (the law, a control, a field or the scope changed — past buyers are notified) · editorial (wording or layout only) · review (checked, nothing changed) · withdrawal. Revision prefix D = draft, not approved and not for sale; A = approved for issue by the person named, on the date shown.
