

EXCLUSION ZONE AND LOAD PATH PLAN

DISPLAY AT THE CRANE

One sheet — the sketch, the zone, the barriers, the marshals, the public

KD-LIFT-EZ-006 Rev A0

Nobody under the load; nobody in the slew. BS 7121-1:2016 expects the plan to define the area of the lifting operation and to control who is in it; CDM 2015 reg 13(1) makes the principal contractor plan, manage and monitor the phase and reg 13(4)(b) makes it keep unauthorised people out, and HSG151 covers the public on the other side of the fence. This sheet is the drawing: the crane, the pick and set-down, the load path, the zone boundary and what marks it, the marshals and the public. It is part of the lift plan (KD-LIFT-CL-001 or KD-LIFT-GL-002), displayed at the crane and briefed with it.

- | | |
|--|---|
| ☐ Zone set out and marked before the crane rigs; set-down area cleared and bearers placed | ☐ Signs at every approach; other trades in the area told the times and the stop signal |
| ☐ Only the slinger and those the plan names are inside; everyone else out, including the delivery driver | ☐ Overhead lines and structures on the sketch match what is on the ground |
| ☐ Public route separated by a physical barrier, not tape; marshal in place where a road or path is affected | ☐ This sheet briefed with the plan and displayed at the crane |
