

SALVAGE, RETAINED ITEMS AND PROTECTION — QUALITY INSPECTION CHECKLIST — QUALITY — ONE PER AREA

What stays, what is saved and how it is protected · scheduled and photographed BEFORE the strip starts · one sheet per area

KD-QA-DM-003 Rev A0

How this sheet works: the subcontractor ticks and initials each point as the work is checked. ONE named reviewer — the principal contractor's site manager or quality manager — releases every HOLD POINT on this sheet, all the way to completion. The client, contract administrator or clerk of works signs once, at the end. A stack of these signed at a desk is not evidence — every hold point needs a reading, a photo reference and a date. Issue with the activity RAMS.

3. Retained items scheduled and photographed before strip

HOLD POINT

- ☐ Every retained item in the area listed on the schedule with a photograph reference showing its condition before work starts; the photo log on KD-QA-SYS-012 carries the references
- ☐ Pre-existing damage to retained items recorded item by item and agreed with the client's representative — undocumented damage becomes the strip-out contractor's cost
- ☐ Retained items marked on site (tape or tag) in the colour agreed with the gang so nobody has to remember

4. Protection installed

HOLD POINT

- ☐ Protection to every retained item as the specification names — boarding, wrapping or enclosure — fixed without fixing into the item itself
- ☐ Retained floors protected over their whole area with a material that resists the plant and debris that will cross them; joints taped
- ☐ Protection inspected and made good at the start of every shift while stripping continues

5. Salvage handling and storage

CHECK & RECORD

- ☐ Every salvage item removed by the method the schedule states, labelled with its schedule number and origin, and photographed after removal
- ☐ Stored in the location recorded above, off the ground, dry and secure; fragile items crated
- ☐ Salvage register updated the day of removal — item, condition, store location

SUB SELF-CHECK — INITIALS	DATE					

6. Damage found during strip

CHECK & RECORD

Any damage to a retained or salvage item recorded on the day it is found with a photograph, reported to the reviewer and carried to the snag list or NCR below

7 SNAGS FOUND IN THIS AREA — MINOR DEFECTS FIXED AND RE-CHECKED ON THE SHEET

A snag is a defect the trade puts right and someone else re-checks. Anything that fails an acceptance criterion outright, or cannot be fixed in the area, is a non-conformance and goes in the next section instead.

R REVISION HISTORY

Every revision of this document, and every review that found nothing to change. The revision on the front of this sheet is the one you are holding — check kubitdocs.com for the current one before use.

Rev	Date	Class	What changed	Authorised by
D0	2026-08-29	first-issue	First issue.	— not yet approved —
A0	2026-08-29	review	Approved for issue by the author. Content unchanged from the draft; the draft status strip is removed. No independent third-party review has been carried out.	Author — director, UK principal contractor, SMSTS. Not an independent review.

Class: first-issue · material (the law, a control, a field or the scope changed — past buyers are notified) · editorial (wording or layout only) · review (checked, nothing changed) · withdrawal. Revision prefix D = draft, not approved and not for sale; A = approved for issue by the person named, on the date shown.
